LOS CABOS

A MASTER PLANNED COMMUNITY

Created and developed out of a true love for Cabo, Harmonia offers 51 customizable home-sites beautifully placed in the hills overlooking the Sea of Cortez. Designed with family and community in mind, these homes are ideal for working and living in SOJO Los Cabos, the heart of the South San Jose District.

This project is designed not as a tourist resort but as a place to grow roots, establish and sustain families and professionals, with great parks, walking and riding trails; not to mention the beach! 60-70% of the land has been set aside as common area to accommodate and save as a preserved open space. A master-planned club house within this natural environment will have many features and activities to allow the residents an enriched neighborhood experience.

Kactus Development has taken every step to preserve the land around the new homes, to save the flora and fauna and all that makes this location special in its natural state, because that is what Baja is, a natural coastal and mountain desert to be preserved in as many ways as we can while we live side by side with her. We know that when you visit Harmonia Communities you will see the beauty of the land, the rolling hills with ocean views and the riches of living in a community that was built with care and love, and hoping you're going to choose to stay a while.

WHY LOS CABOS...
